Sonia

Put in Council Mtg File please. Under item 'Ilmenti u Talbiet lill-Kunsill'.

Margaret / Emanuel

Prima facie, they are eligible for such a bay as per TM Guidelines. Also, the bay being identified does not in any way obstruct the traffic circulation. What I usually suggest in such cases is to find another place where to add a white parking bay, so such Un/Loading bay does not adversely affect the area. Obviously, I leave it up to you to recommend approval or otherwise.

Regards
Chris

Subject: Permit for Loading/Unloading car Space

Dear Mayor,

Trust this email finds you well.

We would like to apply for a permanent Loading/Unloading space . We have been in contact with Malta Transport and the instructions they gave us were that we have to apply through the local council first and then you will proceed with the application form.

Please note that our company falls under the category of white goods (Air conditioning and Solar water heaters) therefore on a daily basis our installers will need to load their vans and every month or so we unload containers of new stock. All this usually requires getting permits from the local council and chasing the police station to remove cars which are taking up the parking area.

Attached please find 2 images. One of the images shows clearly where the store is and the other shows once again where the store is and where we would like to have the loading/unloading space.

Our Stores address is: **Standard Buildings, C. Von Brockdorff Street, Msida.**

Your help is greatly appreciated.

Thanks and Regards
